

SHOULD YOU SWITCH FROM A TRADITIONAL OFFICE TO A FLEXIBLE PLAN?

You should switch to a flexible plan if...

1

YOU'RE WORRIED ABOUT HIDDEN FEES, EXTRA COSTS OR FINANCES

Co-working spaces are extremely cost effective compared to traditional offices as they come fully furnished with the latest office furniture and technical infrastructure, such as high-speed internet. Majority of these amenities are already included in the rent, allowing you to save money on overheads and stay within budget.

2

YOU ENJOY FLEXIBILITY

Being flexible is now a very important aspect in this period of time, and has grown in significance since the pandemic. Co-working spaces offer tenants with immense amounts of flexibility in terms of their leases. You can rent a desk or a room by the month or even by the week, allowing you to switch it up any time you like, compared to traditional offices where you're stuck in the contract for at least 5 years.

3

YOU HAVE A SMALL TEAM

Co-working spaces are extremely effective in terms of productivity and cost if you have a small team or just established a start-up. You can rent a space, specifically a desk, by the number of people in your team instead of leasing an entire office floor like traditional offices.
