

# 4 Ways You Can Bring Sustainability to Your Workplace

PRESENTED BY  **LosDORO**

# 1 Effective Recruitments are the Key for the Management in Human Resource

The general manager has responsibilities for **constructing a detailed procedure of recruitment with clear job descriptions**. This action will help him/her avoid unexpected mistakes and eliminate unqualified candidates.

# 2 The Retention of Loyalty leads to a Solid Workforce

Salary and regulations involving **rewards and punishments** should be a critical concern of every organization.

Workers will increase the devotion if their functions and career path are **vividly demonstrated** in the company.

The major reasons for the staff's resignations have some involvements to **a bad leader**.

Every chief must master the **skills of general management** to limit the rate of resignation

# 3 Capable leaders strengthen the workforce

## A GENERAL MANAGEMENT SHOULD:

- Establish a working environment with **fairness and effectiveness** and identify the field that their subordinates have the best performance.
- Provide staff with **authority** and encourage them to **take control of their specialties**.
- Maximize employee's profession through **training** for staff.

# 4 Artificial intelligence (AI) increase the productivity of the workforce

AI allows users to **process enormous data** for various purposes of management

AI assists people to **complete repetitive and tedious assignments**, the workforce has sufficient time to practice and improve the professional skills

AI and high technologies are utilized as powerful tools for **training staff and building a sustainable workforce.**
